SUMMARY

Final Year B.Tech student in Artificial Intelligence and Data Science with hands-on experience building production-oriented AI applications using Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), FastAPI, and Computer Vision. Through internships and projects, I have built end-to-end AI applications with a strong interest in Generative AI, AI Agents, and Full-Stack AI Development.

EDUCATION

B.Tech Artificial Intelligence and Data Science | Kumaraguru College of Technology **2023 – Present**
CGPA: 8.47

HSC Computer Science | Bharathi Matric Higher Secondary School **2021 – 2023**
Percentage: 95.3%

SSLC | Bharathi Matric Higher Secondary School **2020 – 2021**
Percentage: 100%

SKILLS

- **Programming:** Python, Java, SQL, HTML, CSS.
- **Generative AI:** LLMs, RAG, LangChain, LangGraph, FastAPI, AI Agents.
- **AI & ML:** PyTorch, TensorFlow, OpenCV, YOLO, Scikit-learn, NumPy, Pandas.
- **Tools:** Git, GitHub, SQLite, VS Code, Streamlit, Google Colab,Docker.
- **Soft Skills:** Problem Solving, Cross-Functional Collaboration, Technical Communication, Leadership.

INTERNSHIPS/ PROJECTS :

- **DSAI Intern | AVL List GmbH (Apr 2026 - Jul 2026):** Built full-stack AI applications integrating LLMs and RAG pipelines for intelligent, context-aware data retrieval. Engineered the supporting SQLite backend to deploy these models into user-facing interfaces.
- **AI & Vision Technical Member | QBOTIX Rover (Sep 2025 - Mar 2026):**Secured AIR 13 in the International Rover Challenge (IRC). Developing deep learning perception models for autonomous navigation and a full-stack GUI for real-time monitoring, collaborating with multidisciplinary teams to integrate software and vision systems.
- **Graduate Innovation Engineer | Forge Innovation & Ventures (Jul 2025 - Jan 2026):** Participated in a 20-week immersive innovation fellowship (ProtoSem) to tackle real world problems through practical engineering and design thinking. Simulated a startup environment to transform ideas into impactful solutions while strengthening teamwork and strategic problem-solving skills.
- **FarmPulse - AI-Driven Data Dashboard:**Built a visualization engine capable of aggregating live sensor feeds and weather APIs. Implemented multiple AI chatbots and a responsive frontend to render complex datasets, providing users with comprehensive, data-driven agricultural advisory.
- **Product Recommendation Agent:** Built an AI-powered product recommendation system using LangGraph, FastAPI, and Retrieval-Augmented Generation (RAG), and integrated it into a responsive Next.js web application to deliver personalized recommendations through an end-to-end AI-powered user experience.
- **DoodleDash:** Developed a real-time AI-powered multiplayer drawing game using Python, FastAPI, WebSockets, and TensorFlow, implementing CNN-based sketch recognition, live inference, and synchronized client-server interactions.

CERTIFICATIONS

- Generative AI Engineering and Fine-Tuning Transformers - IBM via Coursera (June 2026)
- Machine Learning and Artificial Intelligence for Starters - Udemy (May 2024).
- Data Visualization course - University of Illinois Urbana-Champaign via Coursera (Mar 2025).
- Introduction to the Internet of Things and Embedded Systems - University of California, Irvine via Coursera (May 2024).
